

The new Data Protection Act is now in effect in Jamaica, and it's time to ensure that your company is compliant. The Act provides strict guidelines for how personal and sensitive data is collected, processed, stored, and shared. Failure to comply can result in significant fines or custodial sentence and damage to your company's reputation.

The Data Protection Act is modelled on both the EU GDPR and United Kingdom legislations. Our director is a Jamaican with hands-on experience working within UK and wider European legal frameworks. This has given our company the strategic advantage to support clients to pragmatically operationalise the Data Protection Act in Jamaica.

**AVLA BUSINESS SERVICES offer you practical and efficient solutions to meet your legal obligation by:**

- Fulfilling the role of your data protection officer – saving you recruitment and the associated costs of hiring a full-time person;
- Delivering data privacy and security training to staff at all levels;
- Compiling your inventory of data processing activities so that you can register your particulars with the Information Commissioner's Office;
- Completing your data protection impact assessment to meet your legal requirement for submitting same to the Information Commissioner's Office;
- Developing the requisite suite of policies and procedures to meet regulatory and contractual requirements;
- Responding to requests and complaints from the persons for whom data you process;
- Keeping abreast with and update you of legal developments, best practice or risks.

Our data protection services are perfect for individuals, small businesses, and large organizations. We take pride in our ability to provide customized data protection solutions that meet the specific needs of our clients.

At AVLA BUSINESS SERVICES, we believe that data protection is not just a service, but a responsibility. We are committed to providing the highest quality data protection services that ensure the confidentiality and integrity of your sensitive information.

Contact our team today to learn more about how we can help your organization become compliant with the new Data Protection Act. Let us help you safeguard your data and protect your business.
